# About this series

In this exactphilosophy.net series of pocket books, I hope to convey some fascinating novel ideas and findings, roughly one topic per volume, both in very simple words and beautifully presented with color illustrations.

Other than on my website, which is rather focused on researching fundamental questions, here I try to keep things as simple as possible to carve out each idea.

Feel free to start with any volume, while the first one presents sort of an overarching idea, which may or may not be how it "really" is; I am not sure, but remain curious.

All volumes are freely available on my website in digital form already while writing and once finished usually also as printed pocket books from your favorite bookstores.

Enjoy fantastic new worlds!

Alain Stalder (*1966 in Zürich, PhD in physics)

**Volume 10.**

Only what could be extracted without revealing anything personal …

… while the magpie herself stated that nothing in the letters had anything to do with herself anyways…

Alain Stalder is a Swiss physicist (*1966 in Zürich).
