About this series

In this exactphilosophy.net series of pocket books, I hope to convey some fascinating novel ideas and findings, roughly one topic per volume, both in very simple words and beautifully presented with color illustrations.

Other than on my website, which is rather focused on researching fundamental questions, here I try to keep things as simple as possible to carve out each idea.

Feel free to start with any volume, while the first one presents sort of an overarching idea, which may or may not be how it "really" is; I am not sure, but remain curious.

All volumes are freely available on my website in digital form already while writing and once finished usually also as printed pocket books from your favorite bookstores.

Enjoy fantastic new worlds!

Alain Stalder (*1966 in Zürich, PhD in physics)

Volume 9 in English reproduces a selection of my online posts in English, mostly ones to Usenet, but also some to other forums.

Conversely, the same volume 9 in German contains a different selection of posts, namely of ones posted in German, which were mostly to other forums than Usenet.

What the posts contain is often very diverse, especially the ones to Usenet, even though you can only read “my slice” here.

Alain Stalder is a Swiss physicist (*1966 in Zürich).
