Web 2005

Early LaTeX/fox icon version, of late December 2005, with already the main idea in sections *space and time*, *metamorphosis*, *greek philosophy* and *i ching*.

web2005.zip

Web 2009

Richer in content (but also of more varying quality) than most versions before and after until about 2015.

- **architecture** – Click on my email on the top-left corner for separate overviews for readers coming from science, astrology or philosophy.
- **elementary philosophy** and the **first subsection of evolutions** – Basically the same fundamental idea about describing elements in terms of in/out and rest/move as is still the foremost topic on my website today (2016).
- **long-range feelings** – Various considerations around the nature and potential range of feelings and how that could potentially explain many phenomena in this world quite uniformly.
- **elementary star signs** – My model of the star signs in terms of transformations between the four greek elements.
- **magic carpets** – An explanation of my general method of association for exploring symbolic worlds and some applications involving astrology and ancient Chinese culture.
- **moebius lego** – A text that I would now (2016) classify as some kind of precognition of my explorations of "the moon" that followed in 2010, in two versions, one possibly typed only with my left hand.
- **reflectivity** – Some rumination on science and my personal odyssey.
